

Certificate of Attendance

Andrei Averin

has attended the PWs@PhD Erasmus+ school

“Software Engineering Models and Modeling”

October 2 – 13, 2017 at University of Rostock in Germany

Description:

Models are important means to understand domains and practices in order to develop supporting software systems. In software development various modelling approaches such as task modelling, business process modelling, modelling personas or user interfaces are used.

The school provided theoretical and practical insights in the use of models in the context of Human-Centred Design and for Enterprise Modelling.

Reuse of knowledge about architectures, user interfaces and task was discussed based on patterns.

Rostock, October 12th 2017

Prof. Dr. Peter Forbrig
Chair in Software Engineering
